

Scenario 1:

Task

1. Dirty objects must be in the dish area for 15 seconds to be considered clean. Set a repetitive rule on the dish area, so that if there is any object on the dish area for 15 seconds, it gets placed on the bottom shelf.
2. All objects other than the bottle are clean at the start of this scenario.
3. Have the robot pour the contents of the glass into the cup. After pouring, the glass is dirty.
4. You remove the cup with the contents and place it on the side table. Keep the cup there.
5. Have the robot clean the glass if it is not already clean.
6. Once the table is empty of all objects except the sponge, have the robot wipe the table with the sponge.
